

MPS[®]

SPECIFICATION SHEET

The 200 MPS Series are solid, proven, basic zoning panels for single-stage applications, including heat pumps. Budget-friendly option for new construction and other entry-level zoning applications.

arzelzoning.com/warranty

PARTS

MPS Panel

2 zones: PAN-00202

3 zones: PAN-00203

MPS Panel with ModuPASS[®] port

2 zones: PAN-00202MP

3 zones: PAN-00203MP

Dampers

Made for any application, including existing ductwork, finished basements, and/or new construction.

FEATURES

- 2 or 3 zones
- Use any thermostat
- Static-pressure operated bypass damper available
- Single-stage heating and cooling
- Heat pump compatible
- Can add on a FACT board for fresh air control
- Can add on AloneZone board

EQUIPMENT COMPATIBILITY

The MPS can be used with any single-stage equipment including heat pumps. Not recommended for dual fuel systems.

THERMOSTATS

Use any thermostat that provides conventional 24-volt connections R-W-Y-G-O-C.

DAMPER OPERATION

MPS can handle up to 35 actuators. It controls dampers pneumatically. A small pump in the panel provides pressure or vacuum to open and close the dampers. Learn more about our damper options at www.arzelzoning.com/products/dampers.

APPLICATIONS

MPS is a great choice for simple zoning applications with trunk dampers, or just a few branch dampers. It is priced effectively for new construction zoning. Not compatible with multi-stage, variable speed equipment.

ADD-ONS

You can add on a FACT board for fresh air intake. Additionally, an AloneZone board can be added. AloneZone is a non-calling zoning board. It can fulfill a call if other zones are calling; it cannot start the equipment on its own.

WARRANTY

MPS is covered by our limited lifetime warranty. Register the panel within 90 days of installation to activate warranty coverage. Learn more about our warranty terms and claim process at www.arzelzoning.com/warranty.

PLEASE NOTE

MPS does not provide leaving air temperature protection, and is not compatible with multi-stage equipment. Homeowners switching to multi-stage equipment in the future will need to upgrade their panel.
