## AirBoss® Panel Wiring

### 2 Stg Heat Pump w/1 stg Stats & Crisscross Jumpers

**Controlling Two stage Heat Pump and Two Stage Auxiliary Heat w/ Single Stage Thermostats**  
*By placing a jumper from the Zone 1 - Y1 terminal to the Zone 2 - Y2 terminal. This wiring strategy will energize 2nd stage operation anytime both zones are calling and serve any single zone call with 1st stage operation.*
