**Legend**

- Start with the Smaller of the Rectangular Dimensions as either the Table's Horizontal # (GRAY) if it is a Bottom Mount Damper OR the Vertical # (GREEN) if it is a Side Mount Damper.
- Follow the Table to the Corresponding Larger Rectangular Dimension.
- The #'s in the Table Refer to the # of Actuators
  - Add STK-PST02 to Orders when # of Actuators is 2
  - Add STK-PST03 to Orders when # of Actuators is 3
- Round Up for Odd Number Sizes

**Symbols**

/ = Do Not Build or Sell

\* = Non-Standard 5 Year Warranty

**For Tech Support Only**

Standard Product

Built Before

No Record

**For Production Only**

Internal Notes

20150805 - Since 2 actuators cannot fit on an 8" side mount damper, all dampers above 8x22 cannot be made and therefore have been changed to indicate they cannot be built. This goes for the 4" and 6" side mount.

20150917 - Updated the legend to a more user-friendly layout. Updated the list of standard rectangular damper sizes to match the style of the "actuator and post guide" table.

20150929 - Moved the custom matrix onto a separate tab, updated legend to be more user-friendly.
